

Moran Votes for Healthy Kansas Kids

WASHINGTON, D.C. - Congressman Jerry Moran released the following statement on his support for a bipartisan bill to provide health care coverage for low-income children through the State Children's Health Insurance Program (SCHIP). This state program operates in Kansas as HealthWave, a private insurance provider. The legislation passed the House by a vote of 290-135 and has been signed into law by the President.

"If health care is not accessible to the most vulnerable members of our society, our children, any chance of them having long and healthy lives will be at risk," Moran said. "SCHIP and Kansas HealthWave protect children from low-income families who do not have private insurance and do not qualify for Medicaid. Since my first vote in support for SCHIP legislation in 2007, Kansas has seen more than 2,000 additional children enroll in SCHIP. Given the current economic situation, it is even more imperative that these children do not slip through the cracks and that they receive the care and medicine they need to stay healthy."

Kansas facts:

- The 39,483 Kansas children currently enrolled with the Kansas private insurance program - Healthwave- will continue receiving health care coverage with the passage of SCHIP.
- A provision in the bill - authorizing states to expand eligibility for the program - could

extend coverage to another 8,000 Kansas children by Fiscal Year 2013.

- If SCHIP was not signed into law, medical costs for the uninsured would be passed on to the local communities, local hospitals emergency rooms and to Kansas citizens who then incur higher medical costs and higher insurance premiums due to cost-shifting.

- The bill allows for Social Security data to be used to confirm citizenship and identity for Medicaid and SCHIP, ensuring that people in this country illegally do not receive free services.

U.S. facts:

- The legislation would insure four million children nationwide who would otherwise be uninsured.

- The bill would protect coverage for children currently enrolled in the program and expand it to cover 11 million low-income children.

The following Kansas organizations join Moran in his support for SCHIP:
